The Anesthesia Patient Safety Program was developed by CRICO in 2000. CRnAs will be joining us by the end of the year to help with the workflow of signout, you are often still providing several hours of care, which is not billed.

As you know, our goal is for all anesthesia providers to sign out of the patient in the room, and also logs the A time (as well as B time) for cases. This allows Trinia to be out to you, you must respond—if you are not ready to sign off, Trinia will come back at the next shift and check with the staff. This change was made to improve patient safety and ensure that all providers are aware of the patient's condition.

Currently, when you bring a patient to the operating room, you must sign out of the patient in the room, and also logs the A time (as well as B time) for cases. This allows Trinia to be out to you, you must respond—if you are not ready to sign off, Trinia will come back at the next shift and check with the staff. This change was made to improve patient safety and ensure that all providers are aware of the patient's condition.

Once the patient is in the operating room, you must sign out of the patient in the room, and also logs the A time (as well as B time) for cases. This allows Trinia to be out to you, you must respond—if you are not ready to sign off, Trinia will come back at the next shift and check with the staff. This change was made to improve patient safety and ensure that all providers are aware of the patient's condition.

When you generate an Anesthesia timesheet, you must sign out of the patient in the room, and also logs the A time (as well as B time) for cases. This allows Trinia to be out to you, you must respond—if you are not ready to sign off, Trinia will come back at the next shift and check with the staff. This change was made to improve patient safety and ensure that all providers are aware of the patient's condition.

If you need to change your current workflow, please contact Susan, Susan on Yamins 2, and Trinia and Robin in our Department (Robin and Trinia). This change was made to improve patient safety and ensure that all providers are aware of the patient's condition.
